Summary

Software engineer who builds web and mobile applications, covering both frontend and backend. I like turning requirements into clean code that is easy to maintain, and I pay attention to details when solving problems. I work well in a team and am open to learning new tools whenever a project needs them.

Technical Skills

Languages: Kotlin, JavaScript, TypeScript, Python, PHP, HTML, CSS, SQL
Technologies: React.js, Next.js, Tailwind CSS, React Native (Expo), Laravel, Node.js, FastAPI, Prisma, REST API, PostgreSQL, MySQL, Git, Docker
Designing: UI/UX Design

Education

Syiah Kuala University Graduated August 2025
Bachelor of Science in Computer Science (GPA: 3.52 / 4.00) *Banda Aceh, Aceh*

Experience

PT Klik Data Indonesia Jan 2026 – Present
Programmer *Banda Aceh, Indonesia*

- Developed and improved core and supporting modules for KlikMedic, a Hospital Management Information System (SIMRS), based on each hospital's workflow.
- Optimized SQL queries and database structures to keep patient electronic medical records organized and accurate.
- Found, tracked, and fixed system bugs and data discrepancies, making the application more stable and easier for users to work with.

DPMPTSP Aceh Jul 2024 – Sep 2024
Intern, Information Technology Division *Banda Aceh, Indonesia*

- Developed a web-based application for meeting room booking and facility management to improve the internal reservation process.
- Assisted with data backup and technical support tasks within the IT division to ensure smooth daily operations.

Bangkit Academy Feb 2024 – Jun 2024
Mobile Development *Online*

- Completed Android development training with Kotlin and built several Android apps as part of the program.
- Worked collaboratively on a capstone project, SilentScript, integrating an API that runs machine learning predictions into the mobile app.

Projects

NilaiKu | *Academic Assessment and Digital Report Card Platform*

- Built a Kurikulum Merdeka report card platform with role-based access for Admin, Subject Teachers, and Homeroom Teachers.
- Developed with Next.js, TypeScript, Tailwind CSS, PostgreSQL, and Prisma; features Excel import/export and bulk PDF report cards.

FaceInsight | *Face Recognition and Age Estimation Mobile App*

- Developed a cross-platform mobile app that recognizes faces and estimates age from camera or gallery photos.
- Built with React Native (Expo) and NativeWind, integrating face recognition and age estimation REST APIs via Axios.

AvoScan | *Real-Time Avocado Ripeness Detection App*

- Built a React Native app that detects avocado ripeness (unripe, ripe, overripe, rotten) in real time.
- Developed the FastAPI backend with a TensorFlow Lite model and OpenCV, served through REST and WebSocket endpoints.

And Others | *Other web and mobile projects*

Organizational Involvement

Chairman, Informatics Student Association (HMIF) 2024 – 2025
Syiah Kuala University *Banda Aceh, Indonesia*

- Led all HMIF activities, set organizational policies, supervised program execution, and made strategic decisions with the board.
